

Customer

- Treon Oy

Objective

- To develop cloud environment and application for demonstration of different use cases utilizing the data generated by IoT-sensors

Implementation and deliverables

- Cloud solution on Azure platform, to which IoT-sensors are sending data through IoT gateway
- Configurable real time dashboard implemented on PowerBI platform
- Solution is a platform for further development

Feedback

- “Steamlane is a good partner for product development. They have strong know-how on development of cloud services but also speed and flexibility, which have been important while making demanding solutions for rapidly developing industry.”
 - Joni Korppi, CEO, Treon Oy
